ADA Site Survey and Report Description

The Americans with Disabilities Act (ADA) is the most significant piece of Civil Rights Legislation in the past 25 years. It establishes through both law and Supreme Court decisions that people with disabilities have equal rights and access to public domain. The ADA protects both individuals working and receiving services. The ADA contains 5 sections which are:

- **Title I** - Employment (15+ employees / any aspect of employment)
- **Title II** - Public Services (i.e. state and local government including public school districts and employment services, Workforce Investment Boards, etc.)
- **Title III** - Public Accommodations (accommodations and services operated by private entities)
- **Title IV** – Telecommunications (telecommunication services for hearing-impaired and speech-impaired individuals)
- **Title V** - Miscellaneous Provisions (exclusions from ADA jurisdiction such as use of illegal drugs, alcohol, etc.)

**TLC** provides a **comprehensive site review** encompassing the parking adjacent to and into the interior room space for compliance with the letter and the Spirit of the Law. This is accomplished by providing site review services and a report of the review and recommendations for compliance.

The following are samples of the activities contained in a typical site review under Title II & Title III:

- Parking lot review including accessible parking and wayfaring required
- Path of travel as it applies to accessibility of curb cuts and other potential obstacles to site entrance(s)
- Reviewing elevator to ensure correct size, location, and signage of buttons and other accessibility requirements
- Pressure evaluation of interior and exterior doors in facility
- Site rest room compliance for accessibility standards (i.e. signage, spacing, height requirements, etc.)
- Doctor’s offices review for accessibility (i.e. exam tables, scales, screening area, etc.)
- Review of other exam facilities (i.e. for x-ray, mammogram test, etc. accessibility)
- Alternate format informational materials (i.e. braille, large font, assistive listening devices, etc.)
- Emergency preparedness (i.e. flashing alarm lights, area of rescue, etc.)

Our **comprehensive site review** is not an exhaustive process as each survey and report is customized, based on the particular site surveyed. The final **TLC** report contains a detailed review of the results and recommendations. We are here to offer ongoing support to assist you in meeting your ADA requirements of Title II and/or Title III as well as updates to the ADA as they arise.
